- Develop a custom plugin framework.
- Set up the MySQL and FTP connections to send to Fortissimmo for syncing.
- Develop page template for the property search and single property pages.
- Develop a script to search, sort and filter properties by multiple criteria (location, number of bedrooms, number of bathrooms and price range).
- Develop a single property page with image gallery, all property details and a contact form.
- Develop a script to set up the translated versions of the details (either with the tags from qlang or pulling the translated data from the database).
- Migrate the plugin to the clients sever upon completion.
- 1 week of follow up support post launch.
