General / Design:

- Design pages
- Install and configure WordPress.
- Install and configure a premium theme (Bridge or other equivalent).
- Design the general layout of the site (header, navigation, general page design & footer).

Custom Development:

- Develop a custom plugin framework.
- Develop custom user registration, log in and my account forms.
- Develop a custom admin panel to set the fields required for the data collection form (to keep it flexible for the client to update / add fields).
- Develop a front end data collection form with required fields and validation.
- Develop a custom database table to store the submitted forms with associated user ID and dates.
- Develop an admin only reporting dashboard to show the entire data set, data for selected users and filterable by date range.
- Develop a script to export the reports to CSV or PDF.

Misc / Follow Up

- Ensure all content is translatable via POT file.
- Migrate the completed site to the clients server.
- 1 week of follow up support post launch.
